

Anti-Virus Software On Government Computers

All Government computers MUST have Anti-Virus software installed and the Anti-Virus software on computers on the US Army Garrison, Fort Bragg MUST be Managed.

To verify that your system has the current Anti-Virus software and that the software is managed follow the instructions below:

1. Click on the **SHIELD** on the Task Bar at the bottom of your Desktop Screen. The following screen will appear.

2. Parent Server should read **RS81216AW132** or **81216AG151AP02**.
3. The Program Version should read 9.0 or higher.
4. The Virus Definition File should be a **RECENT DATE**, typically within the last week.

If your computer does not comply with the above contact PSBC, Automation Management for additional assistance, (432-1671).
