

Commerce Human Impact Area

Day 1

Revised Activity List

- Manufacturing
- Operations of and production in technology-based
- High tech industries
- Information processing
- Artisan Crafts
- Horse Industry
- Warehousing
- Research and Development
- Medical Services
- Timber
- Chemical Industry
- Service Industries
 - Banks
 - Insurance
 - Restaurants

Commerce Sustainability Impact Areas:

- Ecosystem
- Water
- Air
- Waste
- Goods and Materials
- Energy

Commerce Headline

“Sustainable Sandhills: A Great Place to Live,
Work, and Play”

- Smart Growth
- Preserved Natural Areas
- World Class Health Care
- Regional and National Transportation Gateway
- First Class Educational System
- Well-Trained Diverse Workforce
- Green Power Available and Used
- Waters Swimmable, Drinkable, Fishable, and Sustainable Supply
- Job Creation and Small Biz Development
- Partnering to address community objectives

Commerce System Impacts

System Condition #1

- ENERGY: Food Processing, Chemical Industry Energy Use, Energy Use in Retail, Biomass As Energy
- AIR: Distant Locations, Transportation of Goods

Commerce System Impacts

System Condition #2

- AIR: VOC Emissions
- PRODUCTS: Non-Woven Fabrics, Re-Use/Second Hand Retail
- WATER: Healthcare Waste, Chemical Industry Waste, Recycled Rubber, Services Industry

Commerce System Impacts

System Condition #3

- WATER: Wastewater in Chemical Industry, Aquifer Depletion in Agribusiness, Stormwater from buildings and Parking Lots

ECOSYSTEM: Timber industry is renewable, Increased tree planting, Environmental degradation, Erosion from deforestation
