Qualities of Sandhills Vision –

1. Good air quality
2. Military/community integration
3. Residents feel safe
4. Community voice in sustainability
5. Efficient transportation
6. Preservation of local community/ties to land
7. Diversity
8. Economic stability
9. Quiet
10. Proper military training without community constraints
11. Good water quality
12. Open space
13. Zero waste
14. Systems efficiency
15. Sustainable consumption
16. Biodiversity
17. Exported safety from Fort Bragg

Sustainability Impacts –

Water –

- Quantity – tourism (e.g. hotels, golf courses) increases quantity demand
- Quality – development (hotels, resorts) causes runoff, soil erosion.

Air

- Air impacts from fuel consumption (both local and out-of-state visitors)
- Preservation of green recreational spaces, tourism, provides O₂ to the system and absorbs (uses) CO₂

Land Use

- Tourism industry promotes preservation of natural areas
- Development for tourism degrades habitats
- Pottery industry disturbs land for material extraction (e.g. heavy metals)

Energy

- Power generation to support the tourism industry uses non-renewable resources

Materials Use and Waste

- Tourists produce non-biodegradable solid waste
