

34 FOOT TOWER USE

Usage Information

Important:

- The USAAAS has two 34 Foot Tower facilities.
- Mandatory training (Basic Airborne Fresher, Special Items of Equipment, New Equipment Training) takes precedence over unit functions and special events requiring tower use.
- Reservation of the Tower does not lock in additional training facilities on the USAAAS training grounds. Request for Mock doors/ Suspended Harness, Classroom and/or Parachute Landing Falls Facilities need to be scheduled at the same time to guarantee availability.

Coordination:

- All unit's requesting 34 Foot Tower use, must contact the Tower Committee Chief or Commander at (910)396-9023 at least 30 days out from the training event to coordinate usage. Failure to request 30 days out, will not guarantee facility availability.

Required Equipment:

- Medical Coverage (Medics with FLA)
- Jumpmaster Teams (Personnel require a Period of Instruction from Tower Committee prior to event)
- Ground Detail: 9xPax per door
- DD 2977 - Deliberate Risk Management Worksheet signed by the appropriate training unit level commander.
